

# Beams and Mantels Collection

## Premium Engineered Wood

Beams are a great way to add interest and architectural detail to just about any space in your home. These hollow box beams use real wood but are lighter and easier to install than solid wood beams. They are excellent at designing around existing structural, electrical or plumbing elements.

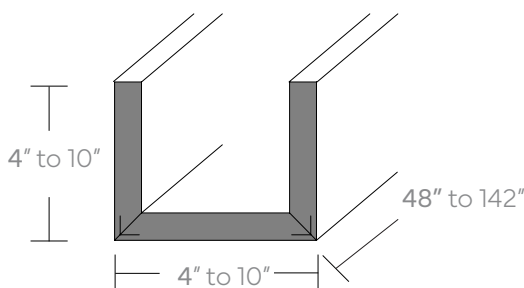

Beams and mantels can be ordered as a stand-alone feature or can be used to complement our premium planking.

- Plywood base with hardwood or reclaimed wood laminate top
- Lightweight
- Easy to install
- Custom built to your specifications\*

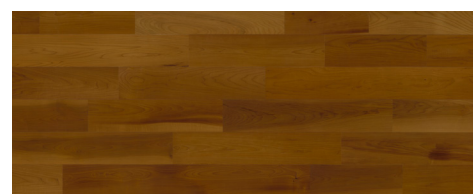

STYLE	PREMIUM WOOD BOX BEAMS*	PREMIUM WOOD BOX MANTELS*
SIZE*	4" - 10" wide x 4" - 10" high	4" - 10" wide x 4" - 10" high
LENGTH	48" to 142"	48", 60", 72", custom
TYPE	U shaped box beam - open end Real wood laminate face on premium plywood box	U shaped box mantel - closed end Real wood laminate face on premium plywood box

\*Only Rustic White Oak has a full width laminate

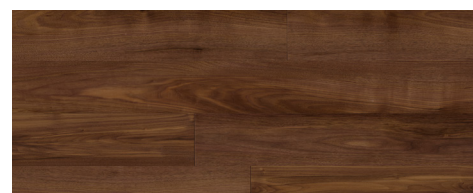

Depending on size, other colors may have edge seams in the laminate face

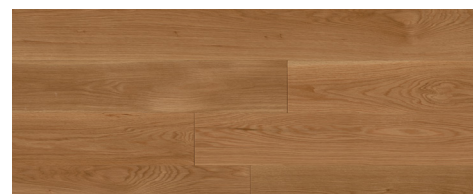

This laminated beam product is a design upgrade from solid hardwoods. It is a non-structural beam for interior use. The premium plywood structure and laminated hardwood face are more stable and more sustainable than typical solid wood beams. Laminated face may have edge seams. Our premium engineered planking meets Indoor Air Quality standards.
